

# Appspace Connect for ServiceNow

## Empowering your data and workflow management

**Transform your data display and streamline workflow management with Appspace Connect for ServiceNow. It's more than bringing data to screens; it's about enhancing the way your team interacts with and leverages this information.**

**Here's what it enables:**

### Simplified dashboard displays

#### Diverse dashboards

Easily configure and display a variety of dashboards, including IT service management, incident tracking, and project status, tailored to meet the specific needs of your audience.

#### Management from ServiceNow

Directly manage dashboard displays from within ServiceNow, offering a seamless experience for ServiceNow experts without the need for frequent Appspace platform access.

### Efficient data synchronization

#### Real-time data sync

Ensures that the displayed information is always current, supporting enhanced decision-making and operational awareness across the enterprise.

#### Workflow synchronization

Streamline and automate workflows by integrating ServiceNow processes with Appspace communications, facilitating smoother transitions between tasks and alerts.

### Enhanced device and channel management

#### Manage within ServiceNow

Manage Appspace devices and channels directly from the ServiceNow interface, simplifying content distribution and device oversight.

#### Centralized control

Ensures a unified point of control for IT administrators to manage and deploy digital signage content, reducing complexity and enhancing efficiency.

**Appspace Connect for ServiceNow** provides a straightforward, efficient solution for displaying critical business data, managing workflows, and controlling your digital signage infrastructure directly from ServiceNow.

Embrace the power of seamless integration with Appspace Connect for ServiceNow, designed for the modern workspace.
